

(To all teachers of science, particularly N. E. A. members visiting Atlanta)

John and Mary and Their Own News-Letters

When your pupils come back to school next fall, you can please them and vitalize their interest in their science studies by letting each of them have his own copy of the SCIENCE NEWS-LETTER.

Mary and John, whether they are upper graders, junior high students or Miss and Mr. in college, will have the text-books vivified and their studies made more important by reading, clipping and making their very own this weekly summary of current science. For school boy and research scientist can, in the SCIENCE NEWS-LETTER, read the same articles with equal profit.

The arrival of the weekly SCIENCE NEWS-LETTER is always an incentive to the earnest student. This publication does not attempt to take the place of the science text-book but supplements it. It gives to its readers the stories of outstanding scientific events just after the activities recorded actually occur.

Special quantity prices where ten or more copies go to the same address make the SCIENCE NEWS-LETTER sufficiently inexpensive to allow every school to purchase a copy for each pupil.

In your plannings for next year, take advantage of this offer (good only for 10 or more copies to the same address):

Per school year, October 1 to June 15, \$1.80 per subscription.

(SHORTER TERM QUANTITY SUBSCRIPTIONS ARE 5c A WEEK PER COPY)

SCIENCE SERVICE,
21st and B Streets,
Washington, D. C.

Send me SCIENCE NEWS-LETTERS
each week during the next school year billing me on
October 1 at your special school rate of \$1.80 per sub-
scription. (This offer good only for ten or more copies
to same address.)
